### **DETAILED ACTION**

This office action is responsive to applicant's correspondence filed July 23, 2004. Applicant has cancelled claims 1-13 and 15-19. Claim 14 is currently pending.

#### ***Allowable Subject Matter***

Claim 14 is allowed.

The following is an examiner's statement of reasons for allowance: The claim specifies "[a] mutant immunogen having the amino acid sequence shown in Seq. ID No. 2." Applicant's mutant immunogen was created by *in vitro* selection of escape mutants in the presence of a monoclonal antibody, mAb54. The monoclonal antibody neutralized the non-mutant (i.e. Wiltenberg strain) Newcastle Disease virus in the *in vitro* population. As such, applicant's mutant immunogen is not considered a product of nature. Furthermore, as indicated in the prior office action, Seq. ID No. 2 is free of the prior art. The closest art to applicant's sequence is disclosed by Millar, N.S. et al. in J. Gen Virol., (1988) vol. 69, pgs. 613-620 and in European Patent Application EP404576 A by Iritani et al. Both Millar's and Iritani's Newcastle disease virus are a 98.8% match to applicant's sequence and differed from applicant's in having a serine rather than an arginine at the critical position 157 of the amino acid sequence.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should

preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael M. McGaw whose telephone number is (571) 272-2902. The examiner can normally be reached on Monday through Friday from 8 A.M. to 5 P.M..
